Response to Arguments

Applicant's arguments, see remarks, filed November 21, 2007, with respect to the bonding of the pyridinium ions being doubly to the macrocyclic complex and not singly bonded have been fully considered and are persuasive. The rejections of claims 1-8 have been withdrawn.

Allowable Subject Matter

Claims 1-8 are allowed.

The following is an examiner's statement of reasons for allowance: See applicant's argument in remarks concerning singly versus doubly bonded pyridinium ions. Furthermore, while Collins et al. (US Pat. No. 5,876,625) teaches a core macrocyclic structure similar to the instant claims, and Stephenson (EP 0306089A2) teaches a pyridinium ion bonded to a macrocyclic complex, there is no motivation or level of predictability of success for the addition of the pendent quaternary nitrogen compounds of Moody (*J. Radioanal. Nucl. Chem.*, 2001, Vol. 248, No.2 431-437).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
